

Health, Safety, and Environment Policy

At *inelectra*, we believe that prevention and conservation awareness in Health, Safety, and the Environment are essential values of all work processes in the execution of our Engineering, Procurement, and Construction activities. Hence, safe work, health, and environmental protection practices and procedures are part of our social responsibility as individuals and as a corporation.

We are a team committed to performing our daily activities safely and reliably, in compliance with all Health, Safety, and Environmental standards and laws, consistently giving special attention to the regular training and qualification of our personnel in this field.

By providing the necessary resources, working on prevention, minimizing risks, and putting into practice lessons learned, we will reach the goal of "Zero Accidents, Zero Professional Diseases, Zero Damages to the Environment" in the performance of our activities.

To achieve this goal, we encourage employee participation and consultation and work on improving and promoting a preventive attitude. Thus, suitable conditions and optimal work environments are guaranteed, reflecting in our well-being, that of our families, and the community.

Jorge Rojas González
PRESIDENT
August 2022

A handwritten signature in black ink, which appears to read "Jorge Rojas González". The signature is written in a cursive style and is positioned to the right of a vertical line that separates it from the typed name and title.
